COMMENTS ON THE SITUATION.

The entire line of the Alt River in Rumanis, running north and south through the country from the Transylvanian Alps to the Danube, now is in the hands of the Teutonic allies. In all directions the invaders are continuing to make progress with Bucharest, their main objective, daily coming nearer. The southern and eastern drive in the Alt region has brought the Teutonic forces across the Topolog River, while to the south, between Riche de Vede and Valeni, their line has been drawn considerably nearer the Rumanian capital. Alexandria, forty-seven miles southeast of Bucharest, has been taken by Field Marshal von Mackensen's troops. In a big battle extending over a front of about seventeen miles northwest and northeast of Monastir, between Tarnova and Makova, the Entente Allies, according to Berlin has met with a

The reports from the Chihuahua district disagree. One has it that Villa is in control of the capital of the States another has it that he is marching northward at the same time. In any event the Mexican sit-uation appears to be as bad as ever, on if not, indeed, worse.

The complete union of the forces of Palkenhayn and Mackensen was doubtless achieved today in the region just to the northwest of Alexandria, where the forces driving eastward from Craiova have established new lines.

In the Upper Alt districts a substantial success was scored by the invaders, a success that directly brought about the abandonment of

the attack and drove the Rumanians out of the entire Topolog sector. These joint operations broke the resistance of the Rumanians, and, to spare as many of their men as possible, they fell back from the entire line of the Alt. The invaders, led by Gen. Delminfingen, then took up positions looking down on the important railroad center of Pitesci.

Francisco Villa's forces have captured Chihuahua City and now hold that city as well as Parral, according to the statement of a Mexican here who claimed to be affiliated with the Legalistas, and to have received a message to that effect from authentic sources today.

The same man said he had also received a resport that Orizaba, a town between Vera Cruz and Mexico City, had been captured by Legalistas and communication destroyed between the seaport and national capital by burning a large railroad bridge and cutting, the wires. He said this news had been suppressed by Carranza censors at Vera Cruz.

Dr. James Fleming, local head of the Federal Bureau of Animal Industry, announced tonight.

The two steers were healthy when placed in the suspected herd several days ago. Tonight veterinarians found the same lesions in the mouth which have signalized the condition of the rest of the shipment.

The calves, hogs and horses which have been inoculated with virus taken from the suspected cattle have shown no effects of the serum. Veterinarians declared it probably would be Wednesday before the infection would make itself evident.

A report that foot and mouth disease had been found in the herd of John Schmidt near Tescott, Kan. was shown Dr. Fleming. The cattle were purchased in Kansas City yards last Thursday, and the farm has been quarantined.

RESTRICT SALES.

Kansas City and St. Joseph markets were operating under a restricted quarantine today. Incoming shipments were permitted unly in cases of cattle for immediate slaughter. No developments have been noticed at St. Joseph, where the Wauneta herd was fed and watered on its way from the Nebraska plains to Kansus City.

A meeting of live stock dealers at the stock yards today was productive of an order which will go into effect tomorrow morning, and will include the disinfecting of the entire stock yards. Pools of disinfectant will be placed at the entrances and exits of all the pens, and tubs of liquid will be placed at all approaches to the yards so that all who enter may dip the soles of their shoes, thereby removing the danger of being a carrier of any contagion. Even the walls of the live gtock exchange, a nine-story structure, will be washed with disinfectant.

Count Tarnowski was nom-inated for his post in Washington by a narrow margin, as Count Ap-ponyi was strongly favored. THE WASHINGTON VIEW.

WASHINGTON, Nov. 27.—Another controversy between the American government and the En-

tente allies is in prospect as a result of the refusal of the British government to grant safe conduct to Count Tarnowski, the newly-appointed Austro-Hungarian Ambassador to the United States.

In the absence of official advices on the subject officials of the State Department were not in a position today to discuss it formally or to forecast the course the government is likely to pursue. It was made evident the unfavorable action of the British Foreign Office on the notice of the intention of the new Ambassador to cross the Atlantic to his post came as an unpleasant sur-

leged character of a diplomatic officer on such a voyage.

Aside from the belief that England would not desire to arouse adverse feeling in the United States
by interference with the ancient and
generally unquestioned right of a
neutral government to receive an
Ambassador or Minister, officials had
counted upon Great Britain's record
in the Mason and Slidell case to
prevent such an action as reported
in today's cable dispatches.

The fact—is recognized that, in
protesting against the removal of
the Confederate commissioners from
the steamship Trent, the British
government was mainly concerned
with the violation of the protection
afforded by the British flag under
which the Trent sailed, and it is said

Another striking instance is that of the extate of the late Henry Miller. On his death he possessed but little property; the greater part of his estate was disposed of three or four years ago. of property titles does not also take place.

Such multiplication and duplication of inheritance taxes is driving philanthropists and capital out of the State. There are many others, like Dr. Norman Brings, who have made the bulk of their fortunes in California, and would like to leave a goodly part of it on their death to our educational and charitable institutions. But they are barred from so doing by our inheritance laws. There is a vast difference between leaving \$100,060 to some worthy educational or charitable institution and turning it over to replenish the ple counter for a "progressive" State administration.

The maximum rate of California's inheritance tax has been alarmingly progressive during recent years. In 1931 the maximum rate was 5 per cent. By 1905 this had increased to 15 per cent. In 1911 the Progressives jumped it to 25 per cent; in 1915 they gave it a further boost to 30 per cent. Priot to 1911 the minimum rate on an inheritance or bequest of \$200.000 was 2% per cent.

Sir Henry Norman, M.P., representing England before the French Invention Bureau, said, in the presence of Ambassador Sharp:

"We don't expect America will join in the fight but we do expect she will try to understand our feelings; will understand our feelings; will understand that we have lost two friends out of every three; that we lose 100,000 of our young men in a few hours fighting; that our sons are hourly exposed to death; that we never dare open a telegram without fearing the worst! but that we feel we must fight this out—if we do not, our children must. We would rather die than suffer defeat."

His climax was exceedingly dramatic and the applause that followed from the nearly hundred Harvard graduates present was thunder-ous.

Federal Court.
[BY A. P. NIGHT WIRE.]
AUGUSTA (Ga.) Nov. 27.—Tom AUGUSTA (Ga.) Nov. 27.—Tom
Watson, the Georgia editor who was
Populist nominee for President, was
placed on trial for thethird time in
the Federal Court here today,
charged with sending obscene matter
through the mail in articles attacking the Roman Catholic Church,
and appearing several years ago in
one of his periodicals. At his first
trial the indictment was dismissed on
a technicality, and at the second the
jury disagreed.
Acting as his own attorney, Watson today indicated that he would
place upon the government the burden of proof that he was responsible for mailing the alleged objectionable matter. He stated that he
was "merely president" of the corporation which published the magazines.

You Are No Better Than Your Teeth

About 90 per cent of the ills of mankind are caused from defective stomachs. Defective stomachs result from improper mastication of foodstuffs. Without good teeth proper mastication is impossible. Many constitutional diseases are directly traceable to bad teeth.

'If the visitor to a dentist's office is given proper instruction on the care of the teeth the result will be a marked general decrease in that patient's dentist bills. Our experts give this advice without cost.

municipalities.

The City Commissioners of Pasadena at a meeting last Friday authorized Manager C. W. Koiner of the lighting department to furnish a bid to Los Angeles. Yesterday the bid with a check, which serves as a bond, were taken to Los Angeles by City Attorney Munger and turned over to the officials of that city.

It is reported that when Los Angeles issued a call for bids the specifications were made so as to shut out all other competitors and make Pasadena an easy winner. It was fixed so the power companies would not have a "look in."

That Pasadena feels confident of obtaining the contract from the large sister city is indicated by the fact that this city has built a high line to the limits of Los Angeles and is at present furnishing a limited amount of power.

"Is there any danger of Pasadena not being successful in the competition for bids?" chairman Hamilton of the City Commission was asked last evening.

"We are not greatly worried," he replied, smiling.
"Do you know whether the power companies in Los Angeles are competing with Pasadena?"
"I do not know for certain," Mr. Hamilton replied, "but my guess is that they are not."
Mr. Hamilton explained that probably later the current would be running the other way over the intercity high line, and Pasadena, instead of Los Angeles, would be the purchaser.

THAT JAR OF MUSTEROLE ON THE BATH-ROOM SHELF

Has Relieved Pain for Every One in the Family

When little Susie had the croup; when Johnny got his feet wet and caught cold; when father sprained his knee; when granny's rheumatism bothered her—that jar of Musterole was right there to give relief and comfort.

Musterole is a clean, white ointment made with oil of mustard. It will not blister like a mustard plaster.

Quick relief for sore throat, bronchitis, tonsilitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosted feet, colds on the chest (it often prevents pneumonia).

All the railroads are placing extra guards along their routes to assist in this work, and the officials of small towns near the border of the county have been asked to keep up an active warfare against the obnoxious migrants. As fast as these are captured they are to be turned over to the county authorities and put at hard labor on the roads.

The twenty-five "weary Willies" captured near Saugus Sunday tried to escape from the jail there by prying loose the window bars and forcing the doors. Yesterday they were put in the County Jail. They will be arraigned this afternoon before Justice Hanby on vagrancy charges.

had been brought up in a home of luxury.

Mr. Reynolds was in business, making \$4000 a year, but he and his bride had not, learned to value money and lived far beyond their means. Soon the crash came. This was in the early part of 1913, not quite two years after their marriage of November 4, 1911. Mr. Reynolds was left without a dollar and heavily in debt. This, with other complications, made trouble for them which ended in the divorce court. Three months before the decree was granted their little son, John David, was born, and it was that little mite of humanity, probably more than anything else, that influenced the young couple to make a secret agreement.

scious in the Southerne Pacific yards. He died a short time later in the Receiving Hospital as the result of a fracture of the skull, received when he fell from the top of a freight car on which he was stealing a ride. Papers in his possession showed he was 22 years old and a medical student of Raleigh, N. C. A memorandum revealed the story of his trip across the continent, with the purpose of defraying all expenses and spending less than \$20 in traveling between Raleigh and Caliente, Nev. The police learned he had aprived here on a freight train and was preparing to continue to San Francisco when he fell. He had more than \$10 in his pocket at the time of his death. His parents in Raleigh have been notified.

people felt mighty bitter towards me."

Finally he borrowed enough money to leave Denver and go to San Francisco, where he remained six months. But he failed in every effort he made to get along.

Discouraged and almost penniless he came to Los Angeles, and here for six months he all but starved, working as an "extra" at \$6 a week in motion-picture companies. It seemed as though fate had decreed he must remain apart from his wife and the baby he loved.

But one day, as he was wondering if the baby he had not seen or even heard of since the child was 3 months old, could possibly love "daddy," and if the years had changed the girl he still cared for and had caused her to forget him, opportunity opened wide many of her doors to him. He recognized his chance, took advantage of it, and made good. Storles of his success reached his former wife, but not one word did they write each other until ten days ago.

Dr. Tiffin was a well-known physician, and later, hotel man, of Los Angeles. He was born at Knoxville, Mo., January 12, 1850, and he graduated from a St. Louis medical college in 1870. He practiced his profession for twenty-two years in Missouri, and during that time also engaged in the raising of blooded stock.

In 1887 he came to Los Angeles, accompanied by his wife, Mrs. Ellen Tiffin, to whom he was married in 1871, and settled here, engaging in the hotel business. During the succeeding years he was manager of the Hotel Broadway, Hotel Livingston and the Louise Hotel. He retired in 1903. In May, of this year, he gave the sum of \$30,500 to Occidental College as an endowment fund, in memory of his daughter. Pearl, who died while a little child. When the laws of a State become so incolerant that her best citizens are forced into exile in order that they may give financial assistance to the educational institutions of that State, we are harking back to the worst abuses of despotic govern-ment. It seems incredible that a common wealth of the high average intelligence of that of California should permit itself to be so misgoverned. Dr. Bridge is but one of many capitalists and philanthropists who have been driven from California by the fury of legislation for "human rights," legislation fostered by fanatics, radical and

(3.) A section of the inheritance tax law makes this apply to real property held in California by residents of other States, to property held in other States by residents porations regardless of the domicile of the owner and to securities of foreign corporations held by a resident of California

Dr. Bridge could not avoid the inheritant laws by giving away his property during his lifetime; for the law provides that the inheritance tax may be levied where a resident has disposed of property without receiving valuable consideration therefor, provided it can be shown that this gift was practice the inheritance tax attorneys go esident during the ten-year period prior to to extending their search much farther

For more than thirty years the law re be willed to individuals has stood in our opment of many of our educational and philcalled so vividly to the attention of the general public until it was coupled with our new inheritance tax laws which fix a maximum of 30 per cent. on wealthy estates where there are no direct heirs. These maximum rates have doubled during the last six years and our inheritance tax rates, like most of our other State tax rates, are

the highest in the United States.

New complications were added this year when the Democrats passed in Congress a Federal inheritance tax law. California had more reason to complain than almost any other State, but womanlike, kissed the any sort of peace terms to the administration reduced the citrus fruit tariffs mations across the seas. \$3,000,000 a year in the price which California growers could expect from their cit-rus products. Then, in order to make up for that \$3,000,000 loss in revenue, the Democrats levied an income tax that will extract \$3,000,000 a year from California estates. That means a net loss of \$6,000,000 a year growers and \$3,000,000 to our estates.

These taxes and restrictions have "pro gressively" accumulated until little is left of an estate when the State and Federal authorities are through. When one capital st sees the estate of another confiscated he naturally withdraws and makes his dom icile and his investments where the laws

are less prohibitive and confiscatory. California is an empire of virgin oppor-tunity. No other State is so rich in undeveloped resources. But we are blocking our own development when we thus har ass capital and investments. Surely the time has arrived for us to amend alike our laws and our manners in the treatment, both of our own successful residents and foreign investors.

E NSLAVEMENT OF BELGIANS. Before the advent of the Savior Mankind the invader exercised the right to enslave the people of a captured country. This right was recognized in Roman law and existed as far back as the Babyionian captivity of the Jewish nation, but it.has

been abandoned for 2000 years. Germany, it is said, has revived this an cient practice by the enslavement and deon of 45,000 Belgians. Lord Robert Cecil says that this was not a case of brutal excesses by victorious soldiers against individual citizens, such as had occurred in all wars. It was a deliberate attempt by Germany to annihilate a people. These Belgians who were being deported to Germany were not going there for any ordinary work, but were to be caught up and crushed in the great new German machine for mo-bilizing labor. They would be scattered through all the manufacturing towns and in all the remote corners of Westphalia and when caught up in that machine they would never return to Belgium. It was this grinding up of a nation piecemeal which was the most horrible feature of the situa-

A very slight swelling of the traffic will now dam up Broadway like

Although the remedy is not apparent, there must be a remedy. If there is one among the readers of The Times who feels that he has a way out of the difficulty, it would be a public benefit to state it. Let there be a symposium. To this end, The Times invites short letters from its readers on this subject. They must be limited to 250 words each. Leave out the argument: just state the point and address the "Traffic Editor, The Times."

THE ADAMSON BILL AGAIN.
One contention of the railway train hands, which they maintain cannot be answered, is that by a general strike those who participate in it simply exercise their indisputable right to quit their employment, and, in behalf of government ownership and conduct of railroads, it is urged that railroad workmen in order to obtain jobs might be required to enlist for a stated term, and would then occupy the same status as soldiers who could be court-martialed and punished for desertion.

On the other hand there never has been a general strike in industrial occupations where the hiring by the employers of new men has not been followed by scenes of great disorder, that on such occasions the disorderly elements of the community, particularly in the large cities, are let loose, and abundant opportunity is offered for violation of the law, not necessarily by members of the brotherhoods, but by criminal and disorderly people who seize the opportunity for destruction and violation of the public peace in conditions of commotion. This tendency of strikers and their sympathizers to insult and assault peaceful workers who accepted the jobs that the strikers abandoned has been repeatedly ilustrated on this coast and in eastern centers, but while such acts may be punished they cannot be prevented by what would, if it were lawful, be the simple process of preventing a laborer under contract to serve a specific term from violating his contract by quitting employment. The Federal courts have repeatedly held that an injunction will not issue against strikers to restrain them from leaving the service of an employer, for equity cannot extend by mandatory injunction its jurisdiction to compel the perform ance of personal service as against either the employer or the employed. The issuance of such an injunction would be an unwar rantable invasion of one's natural liberty. One placed under such constraint would be in a condition of involuntary servitude, a condition which the supreme law of the lan says shall not exist within the United States or any place subject to its jurisdiction.

If the United States Supreme Court shall declare the Adamson law to be unconstitu tional it is not probable that Congress will be menaced into the enactment of a substi-tute for it. Congressman Bennet of New York City voted against the Adamson law He declared that its passage would be the and that the method by which its passage was being procured was a "shot gun procedure." He compared the action of the train hands to that of a mob in Lima, O., which took the Sheriff of that county from his home with a noose around his neck in the effort to force him to deliver one of his prisoners over to them, and beat him into lousness because he refused to violate his oath of office.

Even if the Supreme Court should affirm the constitutionality of the Adamson law it will be up to Congress to repeal it, for, unless it repeals it, it may next be called upon vance the pay of the remaining 1,600,000 men in the railroad industry, and if it does that, within a short time it will have to fix the pay of every employee of every factory in the United States that manufactures goods to go into interstate commerce—then we would have reached ar advanced stage of governmental socialism and the legislative power of the governmen will have disappeared as an effective from the government of the United States.

H ARD LINES.

Whatever of individual liberty is left to British subjects residing in the United Kingdom is apparently about to be taken from them by a drastic government order to be issued under the broad authority of the act of Parliament known as "The Defense of the Realm Act."

A telegram from Westminster states that a food controller is to be appointed with wide and dictatorial powers. He will have complete authority in acting as he think best in regard to food problems and will be enabled to proceed against any perso who wastes or unnecessarily destroys any article.

Other powers that the government will assume will be directed to prescribing the purposes for which an article shall or shall not be used and to controlling the manufacture of certain articles of food, partic ularly flour. The government will also as sume power to deal with the mode of sale and distribution of an article so that if it becomes necessary to embark on food tick ets they will have power given to do it without long and protracted discussion Power will also be taken to regulate mar ket operations, if necessary, and to fix maximum prices.

The government admits that these meas ares will work hardships, but asks the people to put up with them so that those who are giving far more for their country should be allowed to reach glorious victory

One of the problems which the operation of this drastic order will present will be that the number of compulsory enlistments of farm laborers has depleted the supply and caused a great advance in the wages of those remaining. This will increase the cost of producing food and if the government shall now decrease the price of the food below the cost of producing it the farmers will cease to produce any food be youd what may be needed to supply their own families.

As the war continues it presents constantly new and perplexing problems which the Englishman can solve but in one wayby leaving the country.

Concerning Sleep.

Thomas A. Edison, than whom, etc., etc., has come to bat with a new theory to the effect that the sleep and that, within a few cycles, people will not be sleeping at all. It is our belief that the people are approaching the sleepless stage predicted by the great inventor

leaps and bounds.
One of Mr. Edison's inventions, the horseless music box, or phonograph, as it were, may be held largely responsible for the lack of slee in many neighborhoods. Along i the wee sma' hours a good many people are cranking up these de-vices for the purpose of learning the latest wrinkle in the trot or dip

r twinkle.

There are others who want to sleep, but can't. Some of the con-tributing causes of the epidemic of insomnia which has the human race n its iron grasp are popcorn whistles, amateur sopranos, muffle cut-outs, cats, colic, college quar-tettes and locomotive bells.

to work in the daytime, digging sewer excavations and carrying hods filled with brick. It may be true that the people who have to work in the daytime are growing to be more and more in the minority, but they are still old-fashioned enough to require a few winks at night. But one can get used to any-thing and they are rapidly reaching the point predicted by Mr. Edison. There was a time when every-body slept at night, but the bur-glars. Now scarcely anylog slept at night, but the bur-glars. Now scarcely anylogy slepts glars. Now scarcely anybody sleeps excepting the night watchman The time may come when a man will be able to increase his efficiency 100 per cent. by staying awake and

working twenty-four hours a day and, judging by the present increase in the cost of living he will soon be obliged to do so.

T A MOMENT when the great war for freedom seemed degenerating into a dog fight and a trade squabble, when the original quest of a conclusive peace had been replaced by the dream of a peace propped up on a commercial boycott, it is a relief to find Mr. Asquith lifting back the war to its fighting, he has reasserted, to bring protection to the weak, supremacy of right over force." Civilized mankind is once more declared to be a family, each state of which, great or small, is entitled to "free develop-

or small, is entitled to "free develop-ment under equal conditions and each in accordance with its own genius." Here indeed is the only road for the peoples to a final peace. It is embarrassing for the British protagonists of these noble and novel principles that they find them-selves leagured with two peoples— the Russians and the Rumanians the Russians and the Rumanians— peculiarly identified with the old re-gime of force, the first of which in-deed holds in subjection a million of the second. But if, as I trust, the secret treaty of alliance stipulates the restoration to Rumania of the bulk of Bessarabia, Mr. Asquith's ideal will to that extent have been bulk of Bessarabia, Mr. Asquitas ideal will to that extent have been indicated. Unfortunately, however, the capital of this very territory is the notorious Kishinev, so that one section of its habitants might only be passing from the fire to the frying pan. For if Rumania has not massacred her Jews she has not hesitated to deny them political rights, even though these rights were guaranteed by the Berlin congress. That congress, which gave Rumania independence on condition of equality for all citizens, irrespective of religion, did not foresee the ingenious-quibble by which she would declare even her home-born Jews to be not citizens, but "foreigners." Foreigners, when even Rumanian historians recount that Jews lived all over the future Dacia long before Trajan conquered it in 10!

If Mr. Asquith's peroration is not to remain a mere pretext for ruining Germany the coming peace congress must pin Rumania to the evaded principle of the congress of 1878.

Still more urganity must this prin-

must pin Rumania to the evaded principle of the congress of 1878.

Still more urgently must this principle of equality of citizenship be applied to Russis, for here not a quarter of a million of Jews, but six millions, or half the Jews of the world, are concerned. The Jewish claim for equality, be it remarked, does not go see a Mr. As does not go even so far as Mr. As-quith's programme. His "supremacy of right over force" and "free development under equal conditions" might well imply the readjustment of Russia's relations with all her subject races on a federal basis. But the Jew qua Jew demands no such radical reconstruction, only to be treated no worse than the others. His claim in the lands of his dispersion is in fact not positive, but negative. What he protests against is disquali-

fication, exceptional legislation, in-ferior status. Religious rights are now conceded to the Jews everywhere in Europeexcept in Spain and Portugal—reli-gious persecution, which had at least a respectable motive, having degenerated into mere race hatred. Civil rights—to occupy equally all posts and offices, to be admitted equally to schools and universites, and to live and travel mywhere-vary for the Jews in every country. Nowhere are they fully conceded; even to a free-born Briton like myself it is forbidden to enter Russia, though my books circulate freely in Russian translations. And the same chaos marks the political rights of the Jews, the rights to vote, sit in Parliament, etc. Indeed, so haphazard and illogical is the whole European situation that a Jew of Russia though he is liable to be massacred in the streets, may yet legislate in the Duma. The clarification of this situation on Mr. Asquith's princi-ples is a necessary item of the coming reconstruction of Europe. But it is more a European or a Christian problem than a Jewish problem. If Europe is to be readjusted on a rational and national basis the Jew or imperil the peace equilibrium. But for the Jew proper the only real problem is his return to national life, or to a missionary religion. The former may be partially achieved if in countries where he exists in large, compact minorities he is ac-corded local autonomy, but it cannot be fully attained without a territory in the reckless burn property, the fire loss try amounting to 17 nually. And 65 per be fully attained without a territory of his own under his feet. This cannot be found for him in Europe itself, but outside Europe, in Siberia, Canada, Australia or South Amer Canada, Australia or South Amer-ica, there must be many empty, un-developed territories which a rational world would call upon him to colonize. Even an irrational world recognizes his traditional claim upon Palestine. His political claim may indeed be small, reposing only upon a few agricultural colonies in an overwhelmingly Arab environment. But Arabs are more or less nomadic, while the Jews represent a stable cultural element, as well as an immemorial aspiration, which would attract myriads of immisrants and millions of capital. If these 600,000 Arabs could be expropriated or induced to trek into Arabia—for they move lightly—that would be the ideal solution of the gravest difficulty of Zionism. Otherwise there must be an Arabic heremony, which eviscerates the whole idea of Jewish restoration. No mountain will wittingly labor to produce a mouse. Even a condominium would be fruitful in friction. No, the only solution at once attractive and practicable is But Arabs are more or less nomadic, at once attractive and practicable is the establishment, if even by grad-ual steps—of a full Jewish state where the race that gave the world the Bible may continue its prophetic career. Surely a Jewish guard round the tomb of Christ would have more historic significance than the Turk-

Subscription Books Open Today for Los Angeles on This New Copper Underwriting. 250,000 shares of the pre-organization PROPERTY PURCHASING POOL AND PUBLICITY FUND, is the allotment for Southern California at only 10c.

Terms—25 per cent. cash—balance payable December 1st.

WHEN THE BOOKS ON THIS ALLOTMENT POSITIVELY CLOSE.

BIG JEROME COPPER COMPANY Is now being organized by a strong Arizona mining syndicate. The property consists of approximately thirty-two full mining claims in the Jerome District, with a total holding of approximately 640 acres. The property adjoins the PITTSBURG JEROME and other very well-known and prominent properties. The Capitalization of the Comthe PITTERUNG JEROME and other very well-known and prominent properties. The Capitalization of the Company will be \$2,500,000,00.

THE UNDERWRITING SYNDICATE GUARANTEES that the property will be deeded free and clear of debt to the company, as they stand ready to take up the balance of any allotment that is not fully subscribed. The Board of Directors will be made of strong, well-known mining men of Arizona and Los Angeles.

MR. HARRY E. ANDREWS, MANAGING EDITOR OF THE LOS ANGELES TIMES, has accepted the Vice-Presidency of the new Company. This subscription to this underwriting is certainly a substantial one. Mr. Andrews will represent the Southern California interest in this EIG COPPER COMPANY.

AGGRESSIVE DEVELOPMENT CAMPAIGN TO START IMMEDIATELY. Engineers have already passed on the property and are now working on a complete report. Just as quickly as this can be bomplete, a strong development campaign will be started, and pushed with an energy characteristic of the operators who are behind this new company. Just as soon as the permit is granted by the Arizona State Corporation Commission, application will be made to list the Treasury shares on the Los Angeles, San Francisco, New York and Boston Stock Exchanges. The Company's main office will be at Jerome and its depository will be the BANK OF JEROME. All pool stock will be deposited with the Bank of Jerome, or some other bank. The Treasury shares will be listed at not less than 25c, and REMEMBER—THIS LIMITED ALLOTMENT OF POOL RIGHTS IS OFFERED NOW AT 10 CENTS.

JEROME "THE BILLION DOLLAR COPPER CAMP." JEROME—the home of Senator Clark's famous United Verde Copper mine, which has a record of paying, to date, more than \$40,000,000 in dividends—a close corporation with not a share of stock for sale, the Clark interests owning 85 per cent of the stock.

The Western Pacific Railroad Company

First Mortgage 5% Thirty Year Bonds

Dated June 28, 1916. Due March 1, 1946. Optional at par and accrued interest on any interest payment date on sixty days' notice. Semi-annual interest, March 1 and September 1, payable in New York or San Francisco. Coupon Bonds, with privilege of registration as to principal, in denominations of \$100, \$500 and \$1000, or fully registered bonds. Pirst Federal Trust Company, San Francisco, and Henry E. Cooper, Trustees. The Company has declared its intention to pay interest without deduction of the normal Federal Income Tax.

The issuance of these bonds approved by the Railroad Commission of the State of California.

CAPITALIZATION

EARNINGS
(As officially reported for 13 months unded September 84, 1916.)

Net income about 21/4 times bond interest.

These bonds, outstanding to the amount of \$20,000,000, are secured by direct and absolute first mortgage on the entire property of the Company, which owns and operates 926 miles of main line extending from Salt Lake City, Utah, to San Francisco, California. The total bonded debt is thus at the exceptionally low rate of \$21,600 per mile of main line.

The cash investment in the present property has been in excess of \$80,000,000, and with the proceeds of these bonds, the Company will have on hand about \$19,000,000 in cash to be expended primarily on equipment, betterments and branch lines. The assets of the Company thus aggregate about \$100,000,000, or five times the entire outstanding bonded debt.

The road was built in accordance with the highest engineering standards, and with a view to the most efficient and economic operation, and its present reproduction value is in excess of its original cost, according returns recently made by the interstate Commerce Commission.

The Company owns terminal properties in San Francisco and Oakland which could not be duplicated for less than \$17,000,000, and enters Salt Lake City over private right of way to the Salt Lake Union Depot. With respect to the altitude and grade, the road is the most favorably circumstanced of any trunk line entering California:

The Company is independently owned and efficiently operated and every indication points to expanding earning power and corporate success.

How Dalsy turns the trick, how the joke is turned against the jokers one after another to their individual comical discomfiture, how the "bull" pursues the crooks, and how matters finally come out right for everybody is the string of crisp and exciting events which is bound to hold you in your seat to the last foot of film.

A big human interest is given the story by the love of Dalsy for the crook, just out of prison, who has contracted consumption within its walls.

story by the love of Dalsy for the crook, just out of prison, who has contracted consumption within its walls.

Althambra.

"Bought and Paid For," George Broadhurst's drama, is transferred to the screen at the Althambra this week. In so far as the screen can be a substitute for the spoken drama, with the latter's "suiting of the action to the word." "Bought and Paid For" retains the pith and significance of the spoken piece.

No better troupe of actors has presented the play on the stage than the one appearing in this film adaptation, with Alice Brady and Montagu Love in the leading roles. Of course, James Gilley, that fascinating whipper-snapper of the play, was bound to lose somewhat in spontaneity, but the subtitles are amusing.

Alice Brady has improved vastly since I saw her less ton the screen, and Montagu Love's work as the husband, could not be improved on. The L-Ko comedies are beginning to rival those of Mack Sennett, judging from the one being shown at the Alhambra this week.

The big policeman was chasing a burgilar, but his appearance almost caused a riot, and in the confusion his man excessed.

Song services will be held in the City Jail Thanksgiving Day, through the courtesy of two local singers, Howard Mattell and Mme. Salbaderro. They called on Police Chief Butler yesterday and said they wished to do something to make the holiday more cheerful for the prisoners.

Chief Butler asked them if they cared to sing, and they consented to give a recital during the afternoon. Arrangements are being made to have a piano in the jail.

paper is not a being. To call it an "evening degenerate" does not accuse it of having committed any crime. It refers to the defense that is made by the paper, and by the man who writes the article.

Now, I asked Mr. Earl, "Are you the editor of this paper?" "Yea," he is the editor—that is, he owns them; he owns both of them. "Do you have any other editorial writers?" "Oh, yea, many of them." Now, then, whoever wrote that article of "brutal journalism," or those articles, was the editor of those articles, was the editor of those articles, was the editor of those articles, and that was what poor old Tom Fitch was objecting to and saying that the editor of the article—not Mr. Earl himself; he didn't mean Mr. Earl, but whoever wrote the article, whether it was Earl or whoever it was, "that man is defending degenerates and Sodomitea." But they say it is all right if you wait until after they are convicted.

For Constipation

THE GREEK IDEAL

Health of body and health of mind. How can you have either if you are handicapped by constipation, by the failure of the body's waste-disposing mechanism?

This mechanism is delicate and easily thrown out of gear. Worry, hurry, improper food and insufficient exercise cause constipation. Pill-taking only makes a bad matter worse, because laxative and cathartic remedies, by weakening the

tion, tend to make constipation chronic.

Nujol is entirely free from these objections. It acts in effect as an internal lubricant preventing the contents of the intestines from becoming hard, and in this way facilitating normal movements.

All druggists carry Nujol which is manufactured only by the Standard Oil Company (New Jersey). Avoid substitutes. Write today for booklet "The Rational Treatment of Constipation."

Coase Artillery Falls to Get Needed Support from Supervisors, When County Counsel Points Out Only Legislature Could Provide Funds.

The Board of Supervisors was confronted yesterday by a stone wall, in the shape of an opinion of the Gounty Counsel, declaring that the Supervisors were without authority to make an appropriation to the Coast Artillery, as requested. An appropriation could not be made, it was stated, except by authority of the Legislature. With the view of reaching a way of doing something for this body, the board took the matter under submission.

Capt. Thomas J. Golding of the Coast Artillery was visibly disappointed when the opinion of the County Counsel was read. The appropriation is needed to take care of the organisation until July, when the Legislature will provide means, it is said. It was pointed out to the Supervisors that they had recently appropriated \$1500 for fitting up an armory at the stadium. The Supervisors showed a willing-ness to help the Coast Artillery, if a way can be found.
